

## TECHNICAL SERVICES

We create application engineering based captive opportunities for beneficiaries (Developers, Entrepreneurs, Investors, Financiers, OEM, Systems Integrators, Technology companies and Risk partners), while providing technical and business development support services for clean energy sources that reduce local pollution and emissions of greenhouse gases while growing Margins.

### Applied Research – Process and Technologies

- Solar kits for Golf Carts and LSV
- Solar Powered LEDs Lighting
- Rechargeable Batteries
- Solar Car Wash
- Zero" Energy Solutions
- AMR, Net Metering
- Info Security
- Waste to Energy
- Electric Distribution System
- Electric Revenue Cycle
- Fuel Conversion
- Bio-Fuels

We develop strategic partnerships between beneficiaries (technology and investment partners) and in-country risk partners, where-in Nuworld prepares training programs and provides continuous research, while preparing an investment option for MMC Ontario to be a promoter from Canada.

Services are offered to beneficiaries on fee (for time) plus commission (or royalty) upon success and an investment option for MMC Ontario, an investment holding company for long-term participation. Nuworld Research is not-for-profit division of MMC Ontario.
